Description:

The use case diagram of the Medilink system illustrates the interaction between the main actors: Patient, Doctor, and Admin with the system functionalities. The system is designed to provide a smooth and efficient healthcare management platform.

Patients can register into the system, log in securely, search for doctors based on specialization, and book appointments according to available time slots. Doctors can log in to their dashboard, manage their schedules, and accept or reject appointment requests from patients. Admin has full control over the system, including managing users, doctors, and monitoring system activities.

This diagram clearly represents the overall functionality of the system and shows how each user interacts with different features of the Medilink platform.

Use Case List:

- User Registration
- User Login
- Doctor Search
- View Doctor Details
- Book Appointment

- Manage Appointment (Doctor Side)
- Accept/Reject Appointment (Doctor Side)
- Manage Users (Admin)
- Manage Doctors (Admin)
- Monitor System Activities (Admin)

Actors:

- Patient
- Doctor
- Admin

System Overview:

Medilink is a web-based healthcare management system that connects patients with doctors digitally. It reduces manual appointment hassle and improves communication between patients, doctors, and administrators.
